# HALF CIRCLE SKIRT MEASUREMENT GUIDE

---

## Skirt Measurements

### Length

Measure from your navel (belly button) down to where you want your skirt to stop = \_\_\_\_\_  
Line 1

\_\_\_\_\_ + 1.5 = \_\_\_\_\_ inches  
Line 1                      **Length**

\*The 1.5 inches are for the waistband and hem allowance

\*\*\* Please note: the width of your fabric may restrict you from the length you desire, so you may have to make some adjustments. For example, my desired length was 44 inches, however because I used 45-inch width fabric I was only able to achieve a length of 42 inches. I ended up cutting my pattern piece by 2 inches, at the hem, so that it would fit on my fabric.

## Waist Band Measurements

### Width

Desired Final Width	1.5 in.	2 in.	3 in.
<b>Pattern Width</b>	<b>4 in.</b>	<b>5 in.</b>	<b>7 in.</b>

### Length

**Step 1:** Measure around your navel (belly button) and 2 inches.

\_\_\_\_\_ + 2 = \_\_\_\_\_ in.  
Waist                      **Length**

\* The 2 inches is for 1 inch of ease and zipper seam allowance
